## Project

- **E-commerce**

eCommerce Websites, the system allows users or customers to save their desired products to cart for later checkout. this system has its own "CPanel", this side is for the Website's management or the Administrator Side. The administrator side manages all the data that the website provides to the customers which include managing the products, warehouses, and reports. also, the user can show all products he was buying with all details. and more features.

- **Home-service**

admin =>[add ,Edit ,list . show] Services , edit home page and show All contact us and more.

Dashboard With APIs

- **CURD products**

- **FronD-end,Graphic desgins**

you can check more details in my Github and Behance .

- **grading-system-using-yargs**

For adding Student or Remove it or edit it.
